WILLOWOOD USA 

PRONAMIDE 50

PROPYZAMIDE | HERBICIDE

BENEFITS

- Pre and postemergence control
- Labeled for use in head lettuce, alfalfa, artichokes and Christmas trees (see label for a complete list of labeled crops)
- Absorbed into weed roots for effective control
- Compatible with other crop protection products
- Can be used with COC and other adjuvants (see label for details)
- Controls grasses and certain broadleaf weeds - broad-spectrum weed control at the time of crop establishment
- No residue buildup in soil - no plantback restrictions for certain crops (see label)

Pronamide 50 is a soil active herbicide for both preemergence and early postemergence control of certain winter annual and perennial grasses and preemergence control of other broadleaf weeds.

Willowood **Pronamide 50** is formulated as a wettable powder containing 50% active ingredient packaged in a 1 lb. water-soluble pouches.

Willowood **Pronamide 50** is a soil active herbicide for control of a wide range of grasses and certain broadleaf weeds. The product is a soil active herbicide with uptake by sensitive weeds occurring through the roots. Before using this herbicide for a specific crop use, refer to the product label for general use information that provides important instructions for the safe and effective application of the product.
