January 18, 2011. Roseburg, OR – Willowood USA announced today the company has received California Department of Pesticide Regulation approval for two more post patent crop protection herbicides. California and Arizona have now both approved Willowood USA's registration for Oxyflo 2EC and Oxyflo 4SC.

Oxyflo 2EC and Oxyflo 4SC are herbicides containing the same active ingredients as Goal 2XL* and Goaltender*. Oxyflo 2EC and Oxyflo 4SC now provide growers a generic option to these two important, widely used crop protection products. These products provide long lasting pre and post emergent control of grasses and weeds on a wide variety of crops including but not limited to; artichokes, cole crops, citrus, corn, cotton, garlic, mint, onions, tree fruit, nuts, grapes as well as on fallow beds.

Brian Heinze, President & C.E.O., Willowood USA states, "We currently have registered and are producing a number of high quality post patent alternatives including: Ethofumesate 4SC, Pronamide 50WSP, Tebucon 3.6SC, Tebucon DF, Propicon 3.6EC and Glyphosate 41%. Oxyflo 2EC and Oxyflo 4 SC are an important addition to our growing line of crop protection products".

Willowood USA is a United States based manufacturer of post patent crop protection herbicides, fungicides, insecticides and adjuvant products for the agriculture industry. For more information on the complete line of Willowood USA products, go to www.willowoodusa.com.
